**SUGGESTED RETAIL: \$795.00**  
Limited Availability

**DURABILITY**

**MOBILITY**

**VERSATILITY**

**DEPENDABILITY**

The BlueSky Lite Mast was designed to meet the growing need for an economical, portable, commercial mast system capable of supporting the needs of today's amateur radio operators and emergency response personnel.

Since 9/11 and Hurricane Katrina, it has become apparent that mobile solutions are needed not just at the military level in response to national emergencies, but at all levels including State and Local Government, FEMA, Red Cross, and Amateur Radio. In response, the BlueSky Lite was developed to bridge the gap that exists between military requirements and commercial budgets by offering an economical mast that can support the commercial needs of light duty portable applications at a low cost of entry.

Made from high grade aluminum and designed for quality and performance, the BlueSky Lite maintains the quality and dependability that has become synonymous with the name BlueSky.
